

// OVERVIEW

INSTALLATION & DISMANTLING

Wind energy already makes an important contribution to the share of renewable energies in total electricity demand. In the coming years, the construction of new wind farms will progress, while at the same time older wind farms will reach their capacity limits and be dismantled or repowered. We support you in the construction, repowering and dismantling of wind farms. You decide if you want partial or complete help from us.

WE OFFER

- // Project and budget planning
- // Construction site management
- // Purchase of logistic services incl. tenders
- // Coordination of transport, crane technology and skilled personnel
- // Electrical and mechanical installation of wind turbines (also prototypes)
- // Commissioning of wind turbines and prototypes
- // Disconnection and dismantling of wind turbines
- // Removal of the foundation structure
- // Disposal of all components with verification
- // Technical Documentation

We offer you partial or complete solutions for the installation or dismantling of your wind turbines – whether onshore or offshore.

WHY CHOOSE WP GROUP?

We work independently and across manufacturers. Our focus is on the customer, not the manufacturer. As pragmatists with long on- and offshore experience, we work transparently on flexible and cost-effective solutions.

And we can do more: whether logistics, technical or safety-related tests – we are active in many areas and have experience!
